ERHARDT K

THE AWNING FOR SOLUTIONS IN A TIGHT SPACE, AND THAT DOES IT ALL

ERHARDT K – For inconspicuous beauty

- The entire mechanism as well as the awning fabric shaft are hidden in the cassette awning when in the retracted position. This ensures maximum protection from the elements while at the same time providing an unobtrusive appearance.
- The compact design with its cassette height of only 13 cm allows the awning to be integrated perfectly into the tightest space by making use of the numerous mounting options.
- The motor control integrated as standard improves operating convenience.
- The design of the cassette on the ERHARDT K is unobtrusive and timelessly elegant.
- The robust front shell creates stability and torsional stiffness.
- A radio remote control can also be ordered for even more freedom.
- Durable materials and high-quality craftsmanship form the basis for sophisticated functionality.
- A large selection of additional equipment: Ask your ERHARDT dealer to get valuable tips.

Recommended equipment for the ERHARDT K:

- We recommend the optional variant with a **Remote Control** for the best in operating convenience, especially with the standard series motor. More safety is provided by the **Oscillation Sensor** which closes the awning automatically in strong winds.
- The new **SUNVAS CASA** fabric collection lends any awning a very unique appeal. Special weaving techniques in combination with a linen look create an enticing interplay of light patterns and structure effects.

Tip! Side awning

The Erhardt side awning protects you from curious glances as well as from wind and the sun when it is low in the sky (glare).

ERHARDT SUNSILK/SUNVAS awning fabrics

The SUNSILK collection offers many advantages:

- Exceptionally vibrant and brilliant colours
- Non-fading and weather-resistant
- Easy care surfaces
- The highest UV protection (absorbs up to 97% of hazardous UV radiation)
- Exclusive SUNVAS collection: only available in ERHARDT awnings – pleasantly soft colour brilliance
